

# IHSAN MUHAMMEDALI

## FULL STACK DEVELOPER

---

+91 9567526947    ihsanmuhammadali@gmail.com    Malappuram,Kerala,India

[www.linkedin.com](https://www.linkedin.com)    <https://github.com/Ihsanyes>

---

Motivated developer with hands-on experience in coding, debugging, and project collaboration. Proficient in multiple programming languages and frameworks, delivering scalable and user-friendly applications. Skilled in utilizing development tools to create functional solutions while bridging technical expertise with educational growth.

---

### TECHNICAL SKILLS

Programming Languages	Python
Frontend	HTML, CSS, React JS, jQuery, Bootstrap, JavaScript, Tailwind CSS
Backend	Django, Flask, JWT, REST API, Third-party API, Socket.IO
Databases	MySQL, MongoDB, SQL lite
Version Control and IDEs	VS Code, PyCharm
Design and Prototype	Figma, Canva

---

### EXPERIENCE

#### Python Full Stack Developer at SMEC Labs, Kochi

- Built full-stack apps with Django, React & Bootstrap
  - Developed REST APIs (DRF) with JWT/OAuth auth
  - Integrated React frontend with Django backend
  - Designed responsive UIs with Bootstrap/CSS
  - Used Git, VSCode & PyCharm for development
- 

### PROJECTS

#### Event Dealer Web for Event Creators and Clients

Developed a Django-based web platform that connects event creators with clients. Creators can list services with images and descriptions, while clients browse and book events. Implemented secure authentication, an admin dashboard for management, and a responsive layout to ensure a smooth user experience on all devices.

**Tech Stack:** Django, HTML, CSS, Bootstrap, MySQL

#### E-Commerce Dress Shopping Platform

Built a full-stack web application for online dress shopping using Django and React. Integrated REST APIs for smooth cart operations, product browsing, and checkout. Features include email OTP login, token-based security, an admin dashboard for managing inventory and orders, and a responsive UI for all screen sizes.

**Tech Stack:** Django, React, MySQL, REST API, CSS,

## Real-Time Chat Application using Flask & Socket.IO

Developed a real-time chat web app where users can join chat rooms and communicate instantly. Used Socket.IO for live, bidirectional messaging and Flask for backend routing and room handling. Designed responsive UI using HTML and CSS with dynamic templates for seamless user interaction

**Tech Stack:** Python, Flask, Socket.IO, HTML, CSS.

## SOFT SKILLS

- Collaboration
- Problem-Solving
- Adaptability
- Time Management
- Communication Skills

---

## EDUCATION

College	Govt. Polytechnic College Perinthalmanna
School	Govt. Technical Highschool Manjeri

---

## DECLARATION

I hereby declare that the information provided above is true and accurate to the best of my knowledge.
