Other: cPanel, DNS, Hosting Setup, AWS (Basic)

WORK EXPERIENCE

Datacube Software Solutions Pvt Ltd 2022 - Present

PHP Developer

- Developed scalable web applications using Laravel and CodeIgniter
- Built RESTful APIs for mobile applications including booking and tracking systems
- Optimized complex MySQL queries for reporting and large datasets
- Implemented role-based authentication using Laravel Gates & Policies
- Integrated payment gateways and third-party APIs
- Developed queue-based background jobs for emails and system processes
- Improved system performance and reduced response time

Technical Support - 2020 - 2022

Lychee Technologies

- Provide Software Support to Clients
- Create and maintain servers on AWS, ensuring optimal performance, security, and scalability.

PROJECTS

Cab Booking System

<https://gt.conexihub.com/admin-login>

- Developed full-featured booking platform with admin panel and driver APIs
- Implemented real-time booking, ride tracking, and status updates
- Designed role-based access for admins, companies, and drivers
- Built scalable APIs for mobile applications

HMMotors(Vehicle Management & Accounting System)

<https://hmmotor.in>, <https://hmmotor.in/Admin>

- Built system for vehicle sales, purchase, and accounting
- Developed financial modules including ledger, balance sheet, and reports
- Implemented CRM, employee management, and attendance tracking

Vantara (E-commerce Platform)

<https://vanthara.com>, <https://vantara.datacubeglobal.com/login>

- Developed complete e-commerce website APIs and admin panel
- Integrated Razorpay payment gateway
- Built features like wishlist, order tracking, and analytics dashboard
- Sent Email for delivery updates

Ward Member Management Application

<https://dashboard.wardmembers.com/>

- Designed and developed a ward-level citizen management system for local administration
- Implemented modules for household and citizen data management, task tracking, complaints, and meeting management
- Built REST APIs to support for mobile application integration
Structured scalable backend architecture to handle large citizen datasets

Bhajan Sandhya (Bhajana Programme booking App.)

<https://bhajan.datacubeglobal.com/>

- Developed complete simple bhajana programme booking app.
- Created front-end website to book seats with different category tickets
- Admin Panel to manage Employees, bookings and clients entry reports.
- Created API for employee login and scan qr code from generated tickets.
- Sent Email for ticket booking and admin confirmation.

Cube360 (Custom ERP with Field Force Automation and CRM modules)

<https://www.greenfoot.ashlogix.com/>

Contributed to a Field Collection ERP system handling shop management, financial transactions, and mobile-based lead tracking.

- Worked on an existing Field Collection ERP system with CRM and accounting modules for shop-based operations.
- Implemented ledger management system to track shop-wise transactions, balances, and financial history.
- Developed features for cash payments and receipt generation, ensuring accurate transaction recording.
- Added extra bag charge module, including database updates and calculation logic.
- Enhanced shop registration module with new fields and improved database structure based on evolving business requirements.
- Integrated lead management system from mobile app to admin panel, enabling seamless data flow.
- Built functionality to create leads via mobile app and view/manage them in the admin dashboard.
- Implemented lead follow-up and review system, improving tracking of customer interactions.
- Developed logic to convert leads into shops, streamlining onboarding workflow.
- Performed bug fixing and performance improvements across multiple modules in the system.
- Modified and optimized existing database queries and backend logic for better efficiency.
