### Summary

Full Stack Developer skilled in building secure, scalable web apps using the **MERN** and **MEAN** stacks. Proficient in **HTML5, CSS3, JavaScript, React.js, Angular, Node.js, Express.js, MongoDB**. I enjoy creating user-friendly websites and solving technical problems. I have worked on both front-end and back-end development and understand how to build complete web solutions. I'm always eager to learn new tools and improve my skills in web development

### Technical Skills

**Frontend:** HTML5, CSS3, Bootstrap, Tailwind CSS, JavaScript, React.js, Angular, Material UI

**Backend:** Node.js, Express.js

**Database:** MongoDB, MySQL

**Libraries & Tools:** Git, GitHub, React Router DOM, React Toastify

**Additional:** JSON Server, RESTful APIs

**Deployment & Hosting:** Vercel, Render, Netlify, GitHub Pages

### Experience

#### LuminarTechnolab

May2025–Dec2025

FullStack Developer Intern(MERN&MEAN)

Kozhikode, Kerala

- Built apps using **MERN** and **MEAN** stacks
- Worked with **React, Angular, Node, MongoDB**
- Followed best practices in component-based architecture and responsive UI design.

### Projects

#### Event Management System

*React.js, JavaScript, Node.js, Express.js, MongoDB, Material UI, Tailwind CSS, Context API*

- Developed a responsive MERN event booking platform with real-time event listing
- Implemented secure auth (JWT) for users/bookings, with role-based access and session management.
- Built a responsive and interactive frontend with React for event listing, event details, and user interactions.

#### Car Rental System

*React.js, JavaScript, Node.js, Express.js, MongoDB, Bootstrap, Context API*

- Built a full-stack car rental application allowing users to search, book, and manage rental vehicles online
- Developed RESTful APIs using Node.js and Express.js for user authentication, car listings, and booking
- Designed responsive and dynamic UI with React.js, including search, filtering, and booking workflows.

#### Project Fair

*React.js, Javascript, Node.js, Express.js, Mongo DB, Context API, Bootstrap, React Toastify*

- User can add, edit, delete, and view project with project title, project image, description, profile update
- Implemented secure login and signup functionality using JWT for password encryption
- Built role-based access control, users can manage only their own projects while viewing others public projects.

### Education

**Bachelor of Technology in Computer Science (B.TECH)**

2021 – 2025

APJ Abdul Kalam Technological University

Kerala, India
