PROFESSIONAL EXPERIENCE

Full Stack Developer
Louna Studios

Aug 2023 - Jan 2026
Dubai, United Arab Emirates

- Built multiple CRM platforms using React, Next.js, and Firebase. **Always taking initiative to add features and enhance user experience.** eg:- <https://seefar.group>
- Created dashboards, tracked analytics, and improved workflows **often identifying opportunities to help the team before being asked.**
- **Focused on clean, maintainable code, refactoring multiple codebases to improve performance and readability.**
- Integrated tools like Stripe and automated workflows to streamline payments and onboarding.
- Deployed and managed apps on Vercel and Firebase.

Full Stack Developer Intern
Luminar Technolab

Dec 2022 - May 2023
Kerala, India

- **Independently developed multiple e-commerce** platforms using **Angular, Node.js, Express.js, Typescript, Tailwind CSS** and **MongoDB**, gaining end-to-end experience in **full stack development.**
- Built responsive frontends and **secure backend REST APIs** with features like product listings, **user authentication using JWT** and order management.
- Created a money management website using pure **HTML, CSS**, and **JavaScript** to strengthen core **frontend** skills and improve client-side logic.
- Used **Git, GitHub**, and **Netlify** for version control.

PROJECTS

Seefar Company Website | with Booking

<https://seefar.group>

- Developed a complete studio booking website with an admin dashboard using **React.js, Next.js, Firebase, and JavaScript**.
- Implemented real-time booking management with live availability tracking to streamline studio scheduling.
- Built **role-based access** for admins and users, enabling secure control over bookings and customer data.
- Integrated **email** services to automate booking confirmations, updates, and reminders.
- Deployed using **Firebase Hosting** and managed version control through **Bitbucket** for smooth and organized development workflows.

Media Management and Analytics Dashboard

- Maintained and enhanced frontend and backend features using **React, Firebase, and JavaScript**.
- Implemented key modules such as **analytics** dashboards, interactivity tools, media search, **role management**, and **firebase notifications**.
- Improved user experience and administrative efficiency through **UI/UX** enhancements and better media handling.

E-commerce Website for Product Showcase

<https://homerocks.netlify.app/>

- Developed a **full-stack e-commerce** website for an Italian marble showroom using **Angular, Node.js, Express, and MongoDB**, following the **MVC** architecture.
- Designed and implemented **responsive UI** components with interactive features such as **add-to-cart** and **wishlist** functionality.
- **Integrated custom API** for inventory management, and real-time data updates.
- Applied structured **MVC** patterns to maintain **scalable, organized, and maintainable code**.
