EXPERIENCE

● 2025 - 2026

Digital Engineering Excellence Programming

Mern Stack Developer , August to March , Mohali Punjab

Worked on a Car Inspection Management System enabling vehicle check-in/check-out with role-based access for individuals, companies, and agents. Implemented task assignment features, allowing companies to delegate inspections to agents, and developed detailed inspection reports with history tracking. Additionally, contributed to an HR Payroll Management System, handling employee data, salary processing, and payroll workflows. Built the systems using the MERN stack with Node.js, Express.js, and MongoDB, ensuring scalability, efficiency, and transparency. Followed clean coding practices and a modular architecture to maintain high code quality, scalability, and long-term maintainability.

● 2025 - 2025

JPLoft Solution pvt Ltd.

Mern Stack Developer, march to june Jaipur, Rajasthan

Developed a full-stack doctor-patient appointment booking system with an integrated admin panel, enabling patients to book appointments based on specific health conditions. The project involved creating 50+ dynamic and reusable UI components using Next.js and Redux for a responsive user experience. I built secure and scalable RESTful APIs with Node.js and Express.js, implemented role-based access controls with interactive dashboards for admins, doctors, and patients, and ensured full mobile responsiveness with Bootstrap and SCSS. The system followed clean code practices and modular architecture using JavaScript, HTML, and CSS for maintainability and scalability.

● 2023 - 2025

Digi Triv Technologies and DigiMatte Solutions

MERN Stack Developer, january 2023 to february 2025 ,Ahmedabad , Gujarat

Developed interactive dashboards and dynamic web applications using React.js and Redux, integrating real-time APIs to deliver a seamless user experience. Built scalable and high-performance backend services using Node.js and Express.js. Created and maintained 20+ reusable UI components with a strong focus on responsive design using React, JavaScript, Bootstrap, HTML, CSS, and Sass/Less. Followed clean coding practices and industry standards to ensure maintainable, scalable, and high-quality code.
