

SRIRAM H B

REACT JS FRONT END DEVELOPER

Mobile No: +91 9500791103

Email-ID: sriramhb2003@gmail.com

CAREER OBJECTIVE

A highly motivated **React.js** developer with a passion for creating responsive and visually appealing web applications. Eager to collaborate with experienced developers, learn new technologies, and contribute to exciting projects. With proficiency in **React.js**, **HTML**, **CSS**, and **JavaScript**, I am looking forward to growing my skills while delivering excellent user experiences as part of a dynamic team.

EDUCATION

MCA - KGISL Institute Of Information and Management -2025

TECHNICAL SKILLS

Programming Languages

JavaScript (React.js, Node.js)

HTML5, CSS3

Frameworks & Libraries

React.js, Redux

Node.js, Express.js

Databases

MySQL, SQL

PostgreSQL

Tools & Technologies

Git, GitHub

NPM, Webpack

EXPERIENCE

Intern – Front-End Developer (React.js)

Mahix Infotech Project Duration: April 2025 – Present

- **Developed a fully functional e-commerce platform** as part of my internship at (Mahix Infotech), allowing users to browse products, add items to their cart, and securely complete transactions via **Stripe** payment integration.
- Created the **front-end** using **React.js**, ensuring a dynamic user interface that updates in realtime as users interact with the application (adding/removing items from the cart, viewing products, etc.).
- Used **Redux** for managing global state (like user authentication and the shopping cart), making the app scalable for future feature additions.
- Implemented **responsive design** using **CSS3** and **Bootstrap**, ensuring the platform works smoothly on desktops, tablets, and mobile devices.

- Focused on improving **performance** with **code-splitting** and **lazy loading** in **React**, which helped reduce page load time, making the application faster for users.
- Worked with a **Node.js back-end** to handle API requests and interacted with **MongoDB** for storing user and product data, gaining a basic understanding of database management.
- Integrated **Stripe payment gateway** for secure transaction handling and basic error handling during the checkout process.
- Developed simple **authentication features** to allow users to sign up, log in, and manage their accounts, focusing on handling session state in React.
- Implemented **basic filtering options** (by product category, price, etc.) to enhance the shopping experience for users, and added product details pages to view more information about each product.
- Learned and used **Git** for version control to manage project changes and collaborate with other developers.
- Worked on **improving user experience** by making the app's UI intuitive and easy to navigate, based on best practices for UI/UX design.

ADDITIONAL SKILLS

- **Version Control:** Experienced with **Git** and **GitHub** for version control and collaborative development.
- **UI/UX Design:** Basic understanding of UI/UX principles to ensure user-friendly design and navigation.
- **Problem-Solving:** Strong analytical and debugging skills with the ability to troubleshoot and optimize applications.
- **Testing:** Familiar with basic testing methodologies and unit testing in **JavaScript**.

DECLARATION

I hereby declare that the information provided above is true and correct to the best of my knowledge.
