PROJECTS

LMS Learnix [\[LINK\]](#)

September 25

- Developed a full-featured Learning Management System (LMS) using React and Tailwind CSS, tailored for institutions to manage classes and student activities.
- Implemented features for course management, activity tracking, and structured learning workflows for students and instructors.
- Built interactive modules for assignments, quizzes, and progress monitoring to enhance student engagement and learning outcomes.
- Designed responsive and accessible user interfaces with Tailwind CSS, ensuring seamless usage across devices.
- Optimized state management and component structure for scalability, maintainability, and efficient data handling.

LedgerPro [\[LINK\]](#)

September 25

- Developed a comprehensive accounting web application using React, focusing on modular and scalable component architecture.
- Implemented core financial features such as transaction tracking, balance summaries, and real-time data updates.
- Integrated state management and local storage to ensure persistent and efficient handling of user financial data.
- Designed responsive and user-friendly dashboards with dynamic data visualization for improved financial insights.
- Enhanced application performance through optimized rendering techniques and efficient API/data handling.
