ABOUT ME

Full Stack Developer with hands-on experience in the MERN stack, specializing in building responsive and user-friendly web applications. Skilled in both front-end and back-end development, with a strong focus on writing clean code and creating efficient, scalable solutions. Passionate about learning new technologies and contributing to innovative, growth-driven teams.

TECHNICAL SKILLS

- Programming Languages: JavaScript (ES6+)
- Frontend: HTML5, CSS3, JavaScript, React.js, Redux, Context API
- UI Frameworks: Bootstrap, Tailwind CSS, MUI
- Backend: Node.js, Express.js
- Database: MongoDB, Mongoose
- API Development: REST APIs, JWT Authentication
- Tools: Git, GitHub, Postman, VS Code
- Deployment: Vercel, Netlify, Render

EXPERIENCE

Full Stack Developer Intern

- Worked on several CRUD and mini-projects using the MERN stack.
- Gained hands-on experience in both frontend and backend development.
- Built clean, responsive, and user-friendly web interfaces while ensuring efficient backend performance.
- Developed responsive web applications using modern frameworks.
- Implemented RESTful APIs for efficient data communication between frontend and backend.
- Collaborated with team members to deliver project features on time.
- Optimized application performance and improved user experience through better UI/UX practices.
- Used Git for version control and collaborative development.
- Gained experience in deployment and basic cloud services.
- Followed Agile development practices during project development.

PROJECTS

Portfolio Website (MERN Stack)

- Developed a personal portfolio website using React for frontend and Node.js/Express for backend.
- Showcased project **Todo Application (MERN Stack)**
 - Built a full-stack Todo app with add, edit, complete, and delete features.
 - Created REST APIs using Node.js and Express and stored data in MongoDB.
 - Used React Hooks for state and UI management.

CRUD Application (MERN)

- Developed a full CRUD application using React, Node.js, Express, and MongoDB.
- Implemented RESTful APIs for data operations.
- Added validation and user-friendly UI.

Education Platform Clone (MERN)

- Built an education platform clone with course listing and user features.
- Developed backend APIs using Node.js and Express.
- Implemented responsive frontend using React.

MentorLink Application (MERN)

- Created a mentor-student connecting platform.
- Implemented authentication and CRUD operations.
- Designed REST APIs and MongoDB database structure.

Punch-In App (MERN)

- Developed an employee punch-in/punch-out tracking system.
- Stored attendance data in MongoDB.
- Built dashboard UI using React.

Clash of Clans Clone (React + JS Backend)

- Designed a strategy game-inspired clone interface.
- Implemented game logic and UI using React.
- Connected to JavaScript backend services.

Tumble Run Game Clone (React)

- Developed a simple running game clone using React.
- Implemented animations and score tracking.

Othello (Reversi) Game

- Built a board game with interactive logic.
- Implemented game rules and win detection using JavaScript.
