Education

Poornima University

Bachelor of Computer Application

Expected May 2026

Jaipur, Rajasthan

Experience

Karban Envirotech

Full Stack Developer Intern

Jan 2026 – Current

Jaipur, Rajasthan

- Worked on internal software development, contributing to both backend and frontend features.
- Developed and deployed a CRM system on Ubuntu servers, handling live hosting and basic configurations.
- Managed database tasks, built modules, and resolved issues to ensure smooth system performance.

Celebal Technologies

Node JS Intern

May 2025 – Jul 2025

Jaipur, Rajasthan

- Assisted in developing and maintaining RESTful APIs using Node.js, Express.js, and MySQL.
- Contributed to debugging, testing, and documenting backend workflows, ensuring clean, optimized, and scalable code while learning integration best practices.
- Collaborated closely with the backend development team in a virtual agile setup, completing assigned modules, analyzing issues, and improving overall system efficiency and reliability.

Projects

CRM Order Management System | Node.js, Express.js, MySQL

- Developed a CRM-based system to manage sales order (SO) creation, tracking, and overall order workflow across multiple platforms.
- Integrated orders from Amazon, Flipkart, website, and direct sources into a centralized system with structured data handling.
- Implemented features like payment management, order activity logs, status tracking, and backend validations to ensure smooth processing and data accuracy.

Access Band (Patent Filed) | Express.js, Node.js, EJS, MySQL, Bootstrap, HTML, CSS, JavaScript

- Designed, developed, and deployed a real-time entry/exit management system for Lakshya 2025, efficiently handling 10,000+ daily users and 50K+ access logs with zero downtime..
- Implemented automated log verification and SQL-based validation workflows, ensuring 100% data accuracy, consistency, and system reliability across large-scale operational datasets..
- Executed and tested 50+ functional scenarios, resolved critical issues, and optimized backend workflows and user experience for seamless, high-performance event operations..

Travel Billing Automation Software | Visual Basic for Application, MS Excel, Macros, Modules, Userforms, Command Tools

- Designed and developed a VBA-based automated travel billing system with dynamic invoice formats, validations, and structured layouts to ensure data accuracy and operational efficiency.
- Implemented in a live travel firm environment, streamlining billing workflows, minimizing manual intervention, and eliminating recurring errors through reliable automation processes.

Skills

Languages: C, C++, JavaScript, HTML, CSS, SQL, VBA

Technologies & Tools: Node.js, Express.js, MongoDB, MySQL, Bootstrap, Git, API Testing, VBA, Excel, Macros

Concepts: Design & Normalization, API Development, Compiler & OS Fundamentals, Manual Testing, Test Case Design, Validation & Bug Tracking, Virtual & Cache Memory, Encryption/Decryption

Soft Skills: Analytical Thinking, Problem Solving, Communication, Adaptability, Collaboration, Teamwork

Achievement

TECHNORAZZ WebAthon Winner | Jaipur National University | 🏆 5000/- Cash Prize | 🎁 3000/- Voucher Oct 2025

HIVE Blockchain Project Selection | Tryst 2025, IIT Delhi | [Certificate](#) Mar 2025

ACIC Hackathon Participation | Vivekananda Global University | [Certificate](#) Oct 2024

TECHNORAZZ WebAthon Winner | Jaipur National University | 🏆 5000/- Cash Prize | [Certificate](#) Oct 2024
