PROFESSIONAL SUMMARY

Aspiring BCA graduate with a solid base in web development and programming. I enjoy building real-world applications and am excited to start my career in software development. I'm a quick learner with good problem-solving and teamwork skills.

TECHNICAL SKILLS

Languages: Python, JavaScript

Web Technologies: HTML5, CSS3, JavaScript

Database: MySQL

Tools: Git, GitHub, VS Code

Other Skills: Problem Solving, Teamwork

PROJECTS

LabFlow System

- Academic project
- Developed a lab management system for handling lab bookings and scheduling
- Implemented user authentication and admin dashboard

EVConnect Platform

- Developed a full-stack web application to manage a multi-user Electric Vehicle ecosystem
 - Implemented custom multi-role authentication and dynamic dashboard routing
 - Engineered real-time data syncing for live charger availability and booking metrics
 - Technologies used: Python, Django, JavaScript, Tailwind CSS, SQLite
-

CERTIFICATIONS & TRAINING

Industrial Visit & Training – Bluegen Solutions, Calicut

- Completed a 3-day industrial visit and training program
 - Duration: 10 January 2026 – 12 January 2026
 - Gained exposure to real-world software development practices and industry environment
-

EDUCATION

Bachelor of Computer Applications (BCA)

CCSIT MANJERI (The Centre for Computer Science and Information Technology) – CALICUT UNIVERSITY

Year: 2026
