- Git, GitHub
- Hosting & Deployment: Hostinger, GoDaddy, DigitalOcean
- Tools: VS Code, Figma, Jira, Trello

Project Management Skills

- Agile & Scrum Methodologies
- Project Planning & Execution
- Timeline Tracking & Milestone Reporting
- Risk Management & Mitigation
- Stakeholder & Client Communication
- Requirement Gathering & Scope Documentation
- Quality Assurance & Manual Testing
- Team Leadership & Cross-Functional Coordination

Digital & Marketing Management Skills

- SEO and SMM fundamentals with strong understanding of organic growth strategies
- Campaign strategy planning and marketing roadmap development
- Management of cross-functional marketing teams (digital marketers, graphic designers, content writers, and video editors)
- Client account coordination, page structuring, and brand positioning strategy
- Performance monitoring, optimization planning, and timely delivery management

PROJECT PORTFOLIO

Key Responsibilities:

- Managed end-to-end project lifecycle from planning to deployment
- Designed inventory, billing, and GST-compliant reporting modules
- Developed real-time sales analytics dashboards for business insights
- Coordinated UI/UX, backend, frontend, and QA teams
- Oversaw cloud deployment, performance optimization, and system security

Tech Stack: Node.js, React, REST APIs, Cloud Infrastructure

TecBooks - Accounting & Billing SaaS Software

Role: Project Manager | Solution Architect & Designer

Led the design and delivery of a cloud-based accounting and billing SaaS application, providing end-to-end financial management solutions for businesses. Planned project timelines, defined system architecture, and ensured high-quality delivery of scalable and secure financial software.

Key Responsibilities:

- Gathered business requirements and created detailed project plans
- Designed system workflows inspired by Zoho Books-style processes
- Developed modules for sales, purchases, expenses, and financial reporting
- Delivered 47+ financial reports including P&L, cash flow, and daily summaries
- Managed development team, testing cycles, and cloud deployments

Tech Stack: Node.js, React, REST APIs, Cloud-based Infrastructure

HRM Software - Human Resource Management System (SaaS)

Role: Project Manager | Solution Architect | UI/UX Designer

Led the development of a cloud-based SaaS Human Resource Management System (HRMS) to streamline workforce operations and employee lifecycle management. Owned both the technical and functional design of the system, ensuring scalable architecture, intuitive user experience, and reliable cloud performance.

Key Responsibilities:

- Planned system architecture and designed end-to-end HRMS workflows
- Managed payroll, attendance, timesheets, and employee lifecycle
- Designed UI/UX flows and user interfaces for web dashboards
- Supervised development, manual testing, process validation, and cloud deployment
- Implemented automated payroll and employee performance tracking

Tech Stack: Node.js, React, REST APIs, Cloud Infrastructure
