ABOUT ME

Undergraduate BCA student with a solid foundation in computer science. Passionate about full-stack web development and development, specializing in MERN stack projects using MongoDB, Express.js, React.js, Node.js, and Next.js. Skilled in coding, problem-solving, and collaborating in tech teams to build efficient and innovative software solutions.

SKILLS

- React.js, Next.js, Node.js, Express.js, MongoDB
- HTML5, CSS3, JavaScript (ES6+)
- RESTful APIs, Authentication, Role-Based Access Control, CRUD Operations
- Responsive Web Design, MUI, Tailwind CSS
- Git/GitHub, Visual Studio/VS Code
- Debugging, Testing, Deployment
- Agile Collaboration & Teamwork

INTERNSHIP EXPERIENCE

Limenzy Technologies Pvt Ltd | May 2025 – August 2025
MERN Stack & Full Stack Developer

- Developed and maintained full-stack web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js) and Next.js, focusing on scalable and efficient solutions.
- Implemented user authentication, role-based access control, and CRUD operations for dynamic web apps.
- Gained hands-on experience in front-end development (React.js, Next.js, responsive design, UI components) and back-end development (Node.js, Express.js, REST APIs, database management with MongoDB).
- Worked with version control (Git/GitHub) for collaborative development and project tracking.
- Performed debugging, testing, and deployment, ensuring smooth functionality and optimized performance.
- Enhanced skills in problem-solving, teamwork, and full-stack application architecture, contributing to end-to-end project delivery.

ICT Academy of Kerala | Feb 2024 – May 2024
Full-Stack Developer
Worked as a full-stack developer on web applications, gaining hands-on experience in Node.js and server-side development.Developed and maintained front-end components and back-end services, ensuring responsive and efficient functionality.

PROJECT

Journiq – Travel Management Web Application

⊙ **https://github.com/journiq-org**

- Developed a full-stack web application for managing travel bookings, destinations, and user profiles.
- Built using MERN stack (MongoDB, Express.js, React.js, Node.js) and Next.js, ensuring a scalable and maintainable architecture.
- Implemented role-based access for travellers and admins, CRUD operations for trips, and real-time search and filtering features.
- Integrated image uploads, responsive UI, and dynamic dashboards for enhanced user experience.
- Worked with Git/GitHub for version control, performed debugging, testing, and deployment.
- Focused on collaboration, problem-solving, and delivering a production-ready full-stack solution.

MINI PROJECT

BookBay – Online Book Marketplace

▲ **https://next-book-bay-frontend.vercel.app**

- Developed a full-stack web application for buying and selling books with role-based access for buyers and sellers.
- Built using MERN stack (MongoDB, Express.js, React/Next.js, Node.js) with TypeScript and Tailwind CSS for a modern, scalable, and responsive architecture.
- Implemented user authentication and authorization with JWT, enabling secure login, registration, and role-based navigation.
- Designed and developed CRUD operations for books: sellers can add, edit, delete, and manage their listings, while buyers can view and search books.
- Created profile management features, allowing users to view and update their personal details with image upload support.
- Integrated pagination, dynamic search, and filtering for efficient book browsing and improved user experience.

EDUCATION

University of Calicut, KMO Arts and Science College, Koduvally | 2022 – 2025
Bachelor of Computer Applications (BCA)
Undergraduate BCA student with a strong foundation in computer science. Focused on MERN stack development, software testing, and full-stack projects.

LANGUAGES

- Malayalam – Native
- English – Advanced
